SUMMARY

Software Engineer with 7+ years of experience specializing in full stack development, cloud infrastructure, and enterprise e-commerce solutions. Proficient in building scalable applications with Node.js, NestJS, Python, and Go, with hands-on expertise in AWS, GCP, and server administration. Experienced in delivering end-to-end products from AI-powered SaaS platforms to multivendor e-commerce systems. Proven ability to lead cross-functional teams and drive technical decisions that align with business goals.

EXPERIENCE

Senior Software Engineer

Apr 2023 - Present

Shawne Applebee | Remote

- Developed entire modules for CS-Cart enterprise multivendor eCommerce platform serving large-scale operations
- Built custom addons, functions, and modules enabling advanced vendor management and order processing workflows

Software Engineer (Full Stack)

Sep 2020 - Present

W3cert Technologies | Coimbatore

- Building AI applications using Python with microservices architecture in Go for high-performance processing
- Developing full stack SaaS applications using NestJS and React Router with PostgreSQL and Redis
- Creating Laravel web and eCommerce applications with payment gateway integrations
- Magento and CS-Cart plugin development, custom theme design, and platform customization
- Managing production servers, CI/CD pipelines, and mobile application development

Software Engineer

Dec 2019 - May 2020

Acceedo LLP | Coimbatore

- Developed employee attendance system with QR code scanning and real-time server-side updates
- Built Node.js backend for industrial machine reporting, data aggregation, and analytics dashboards
- Managed server infrastructure including hosting, SSL configuration, and security hardening
- Conducted vulnerability assessments for web and mobile applications identifying critical security gaps

PHP Developer

Jun 2019 - Nov 2019

iGenius AI Pvt Ltd | Coimbatore

- Developed web applications using PHP frameworks with JavaScript, HTML5, and CSS3 frontends
